Bombay Dye-Chem Corporation

BASIC MELT & POUR SOAP MAKING PROCEDURE

- 1 Place the soap base into a microwave safe container. Kindly cover with lid or a plastic wrap, this would reduce the vapour loss & hence help in retaining the transparency of soaps.
- 2 Heat it in the microwave for about 40 seconds. You can increase / decrease the time depending quantity of the soap base being melted. Make sure you do not heat it to a boiling temperature
- 3 Remove the base from the microwave and gently stir it with stirrer, make sure that no chunks of the base are present in the tumbler. Don't stir too hard as it may create excess air bubbles.
- 4 Add colour to the base. The quantity of the colour to be added depends on your preference. However to maintain transparency, do not add more colour
- 5 Add fragrance aroma oils to the base & stir. The quantity to be added should be approx 2 to 3 % being used. Do not add Fragrance when the base is too hot, to avoid evaporation of the fragrance. Natural products, natural butters dried powder can also be added if desired.
- 6 Stir the soap base so as to mix the colour & Fragrance Aroma Oil etc then slowly pour the base
- 7 After pouring Spray the top of the mould with Rubbing agent to remove any air bubbles.
- 8 Allow it to dry for about 25 to 40 minutes depends on the size of mould
- 9 When the soap is fully hardened, simply press the mould over and pop it out

Now your hand made organic beautiful Glycerine Soap is ready to use

LIQUID SOAP BASE MAKING PROCEDURE

- 1 It is a very simple & easy to make liquid soap, as it comes direct to use base
- 2 Empty the required quantity in any bucket or container add ONE PART of water & desired soapy liquid colours in the mixture along with aroma fragrance oil 2 to 3 % of the base stir it properly till it mix properly with help of stirrer or a wooden stick.
- 3 If at all you think that it is thin in nature then add salt 2 to 3 % to the above base for making thick.
- 4 After it is mix properly leave for 1 hour depends on quantity & refill to any air tight container for use

ADVANTAGES

100 % VEGETARIAN SOAP BASES & LIQUIDS, VERY SOFT ON SKIN
ASSURANCE OF HIGH QUALITY END PRODUCT, GOOD FRAGRANCE RETENTION
NO EXTRA FOAM FORMATION DURING PROCESSING, EXCELLENT REINSEALABILITY
SURFACTANT FREE BASES CONTAINS NO SYNTHETIC FOAMING AGENT
PROVIDES AN IDEAL MIX OF PRODUCING LATHER AND MOISTURIZING EFFECT
